

— MAN MADE IVORY —

Man Made Ivory are currently in studio finishing their eagerly awaiting debut album 'Recover' (February 2012).

Formed in the summer of 2007 the band made an auspicious start, opening for *Biffy Clyro* in their first ever live performance. The band continued to build their live reputation and reached the final of *The Clash Of The Titans* in 2011.

With drummer Jordi Langelaan's engineering and music producing experience at BITM Studios they were able to pay detailed attention to the pre-production of their material but, like Rome, the new BITM Studios weren't built in a day. This meant the band only started recording their debut album in January 2011.

In the meantime they took their songs back on the road, further enhancing their live reputation; playing well known venues like *Melkweg* and various festivals and radio shows (*3FM*) throughout The Netherlands, garnering the following reviews:

“Man Made Ivory is a tight rock band with a strong singer showing unity on stage.”

(Clash Of The Titans)

“Man Made Ivory definitely reaches the same level as bigger grunge rock heroes!”

(3voor12)

The MMI band members grew up listening to icons like *Soundgarden*, *Pearl Jam* and *Alice in Chains* and although these bands had an immense influence on their musical careers, Man Made Ivory set out to establish their own individual sound which emphasizes their huge love of rock music.

Expect the band's live shows to be filled with strong guitar riffs mixed and alternated with subtle soundscapes and guaranteed crowd movers. Imagine lead and backing vocals rock bands would kill for, add the neat drum and bass section and prepare for an exceptional, non-stop live show: An unlimited amount of energy guaranteed for every performance. Man Made Ivory.
